

## 200 L/MIN PUMP

<b>Voltage Supply</b>	230 Volt
<b>Max Flow Rate</b>	200 L/min
<b>Pump Type</b>	Vane Pump
<b>Noise (dB)</b>	80 dB
<b>Pump Body</b>	Cast Iron
<b>Vane Type</b>	Technopolymer
<b>Rotor Material</b>	Sintered Steel

Self-priming rotary vane volumetric pump for diesel transfer. Versatile and suitable for various industrial sectors, including automotive, agriculture, transportation, and construction, both for storage transfer systems and portable applications. It is equipped with a self-ventilated asynchronous induction electric motor, featuring IP55 protection rating, class F insulation, and thermal overload protection integrated into the winding. The compact cast iron structure with anti-corrosion coating, sintered steel impeller, and technopolymer vanes ensure reliability and long-lasting performance.

- Robust, compact, and reliable design
- Integrated bypass valve
- Tested for continuous operation
- High flow rate

- Supply voltage [V]: single phase 230/240 - 50 Hz
- Max current [A]: 10
- Power [KW]: 2
- Flow rate [L/min]: 200
- Inlet/Outlet [BSPP]: 1- 1/2"
- Noise [dB]: 80
- No power cable provided
