

OCIO LINK

REMOTE TANK LEVEL MONITORING

OCIO LINK is a new intelligent solution designed to bring tank monitoring systems to the next level.

Manage & view up to 4 tanks remotely in real-time from a dedicated web based App.

HOW IT WORKS

OCIO LINK acts as a smart communication hub, connecting up to four ocio tank gauges to the cloud-based Web App via LAN, WiFi, or 4G. This allows user to monitor tank levels, manage configurations and access system information anytime, from any device.

UPGRADE WITHOUT REPLACEMENT - Retro fit to existing compatible PIUSI ocio gauges

NEW MOBILE-READY WEBAPP - Manage and view tanks from any mobile device or PC through a dedicated web based App

FULL CONTROL OVER DATA TRANSMISSION - Set reporting frequency based on your needs (5–120 minutes) or set auto updates

MULTIPLE TANKS - Connect up to 4 ocio gauges, including mixed configurations, within a single system.

MAXIMUM CONNECTIVITY FLEXIBILITY - Choose between LAN, WiFi, or your own SIM with no mandatory subscriptions or hosting.

REAL TIME NOTIFICATIONS - Receive low level warnings from each tank in real time through the web based App & by email
